

Installing Office

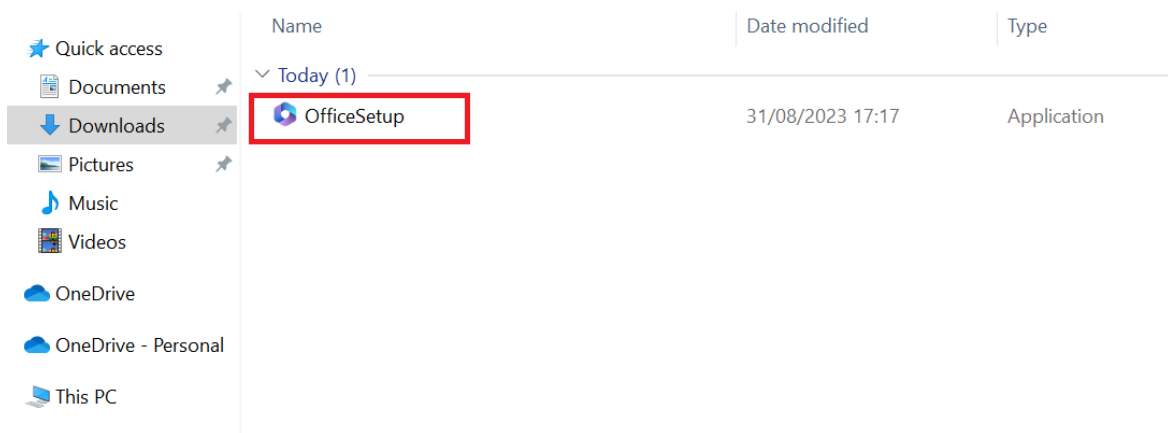

1. If you have logged in to office.com click on "Install apps"

2. A window will open where you have to select "Microsoft 365 apps"

3. After that the office package will be downloaded automatically. Next go to your download folder and double click "OfficeSetup". After that the office installation will start automatically.

The image shows a Windows File Explorer window with the 'Downloads' folder selected in the left-hand navigation pane. The main pane displays a table of files. The file 'OfficeSetup' is highlighted with a red rectangular box. The table has three columns: 'Name', 'Date modified', and 'Type'. Under the 'Today (1)' group, the file 'OfficeSetup' is listed with a date and time of '31/08/2023 17:17' and a type of 'Application'.

Name	Date modified	Type
Today (1)		
OfficeSetup	31/08/2023 17:17	Application
